Welcome to Spring Lake

The Spring Lake HEDGE Advantage

The Spring Lake HEDGE Advantage is built on a solid foundation of hands-on experience, from start-ups to high-growth, high-volume, multi-billion dollar Hedge Funds.

Our highly skilled consultants are Hedge Fund specialists, providing business solutions that enable Hedge Fund Managers to implement their strategies to the greatest and most profitable advantage. We offer comprehensive advice and support for trading and operations systems, processes and procedures. Spring Lake Advisors delivers solutions using our business and technology experience to provide the most efficient and appropriate business platforms for each client's individual needs.

Spring Lake has been reliably and successfully delivering results for over 10 years. Our team of over 60 consultants has a stellar track record in providing project-based IT guidance and development to the financial services industry.

Spring Lake – Delivering Hedge Fund Solutions

Whether you manage a multi-million or multi-billion dollar fund, Spring Lake has the experience to build and maintain the right operating platform for you.

- Our solutions flow from practical experience in sophisticated, multi-strategy Hedge Funds from the trading, CFO and CTO perspective.
- Our solutions are scalable, providing the operating platform that is right for your current needs but designed to grow into the future.
- You'll avoid unnecessary expense without restricting your ability to grow, and build the business environment to confidently meet compliance and control requirements demanded by regulators and investors.

Spring Lake Specialized Service

Spring Lake Advisors architect solutions with a complete understanding of the business side of Hedge Funds. Rely on us for:

- Technology infrastructure build with ongoing administration and support
- Architecture of straight through processing solutions
- Design and build of best-practice operating platforms to meet compliance and control requirements of regulators and investors

- Selection and integration of systems applications to meet trade order management, portfolio management, risk management, portfolio accounting, and compliance needs
- Development of customized work-arounds to deal with limitations of systems applications that are currently available in the marketplace
